

**VEHICLE INFORMATION/TEST SPECIFICATIONS
FMVSS 103**

1. Provide two (2) full size reproduced copies of the actual windshield patterns indicating the critical areas A, B and C. All these areas shall be shown in SAE Recommended Practice J902 dated August 1964, except areas A and C which shall be established in accordance with tables shown in FMVSS 104.

2. State whether or not the windshield wipers were used during your FMVSS 103 certification testing.

3. Provide the engine speed used during FMVSS 103 certification testing, i.e., the engine speed in neutral or the engine speed, load, vehicle speed and transmission gear.

4. Provide the windshield glass exposed surface area.

5. State the temperature (F) at which the engine coolant thermostat starts to open and the time to open from the start of the test.

6. State whether or not windows were open or closed during FMVSS 103 certification test.

7. Provide two (2) sketches or photographs indicating the location of the heater or temperature control lever position used during FMVSS 103 certification tests.

8. Provide any other vehicle or engine settings recommended for winter operation and window defrosting, i.e., air cleaner position or defroster outlet positions.
