State of Kansas

Highway Safety Plan FFY 2007

Kathleen Sebelius, Governor
Deb Miller, Secretary, Kansas Department of Transportation
Terry Heidner, Director, KDOT Division of Planning and Development
Pete Bodyk, Chief, KDOT Bureau of Traffic Safety

The FFY 2007 Kansas Highway Safety Plan is being submitted to NHTSA and FHWA. The report describes the processes followed by the State of Kansas in the use of federal highway safety funds, consistent with the guidelines, the priority areas, and other requirements established under Section 402.

2007 EXECUTIVE SUMMARY

This one year planning document describes the processes followed by the state of Kansas in the use of federal highway safety funds, consistent with the guidelines, the priority areas, and other requirements established under Section 402, 163, 410, 2010, 2011, 1906, 2009 and 408.

Process Description. Below is a summary of the process currently followed by the Kansas Department of Transportation (KDOT) Bureau of Traffic Safety (BTS) to plan and implement its federal grant program. The program is based on a complete and detailed problem analysis prior to the selection of projects. A broad spectrum of agencies at the federal, state, local levels and special interest groups are involved in project selection and implementation. BTS also awards grants internally to supplement special projects and effects of statewide significance.

Problem Identification. Problem identification is performed by the Bureau of Traffic Safety (BTS) Program Consultants with the support of the BTS Research Analyst, KDOT Division of Planning and Development Geographic and Accident Data Section, and under the policy guidance of the Chief of the Bureau of Traffic Safety. Input is received from other public health and safety specialists in the public and private sectors, such as the Kansas Highway Patrol, Kansas Department of Health and Environment, Department of Revenue Division of Alcoholic Beverage Control, SAFE KIDS Kansas and local law enforcement agencies from across the state.

This past year, BTS has increased local involvement in the HSP planning process. Input was solicited at our Click It or Ticket law enforcement luncheons, during project conferences with all current grantees, during monitoring activities and whenever a BTS employee attended a meeting with a community or advocacy group. BTS also sent an email out to a large group of interested parties soliciting their input for the HSP.

Analysis is performed on statewide data including vehicle, driver, roadway and crashes; surveys include observational, knowledge, attitude, offender and opinion. Statewide problem analysis is performed on major indicators such as alcohol-related crashes, youth involvement in crashes, speed-related crashes, occupant protection observational usage, motorcycle crashes, pedestrian and bicycle crashes, work zone crashes, large trucks, DUI arrests, and roadway environment.

Problem area analysis ranks counties and cities by the 2000-2005 severity of the total crash problem (see Tables 1 & 2) based on the average ranking of total crashes, fatal crashes, injury crashes, total crash rate, fatal crash rate, injury crash rate, alcohol-related crashes, alcohol-related fatal crashes, alcohol-related injury crashes, teenage total crashes, teenage fatal crashes, teenage injury crashes, motorcycle crashes, plus pedestrian crashes. Additional data analysis is performed on crash severity by time of day and population. Supporting data analysis includes DUI arrest activity, severity of teenage crashes, and severity of single vehicle crashes (surrogate measure for drinking and driving).

Data systems and/or studies accessed include the Kansas Motor Vehicle Accident Reporting System (police-reported crashes), Kansas Statewide Student Survey, Kansas Safety Belt Observational Surveys, Department of Revenue Driver Records, and Judicial Data.

Priority Emphasis Program Areas. Results of data analysis are used to formulate the priority emphasis areas to be addressed in the state. Prior year’s program/project evaluations, both impact and process, are
reviewed for effectiveness and prior year’s progress. Other environmental factors are considered, such as law changes, federal initiatives, KDOT strategic goals and objectives, and other state initiatives affecting highway safety.

**Project Site Selection Criteria.** Project site selection supports the priority emphasis areas identified in the problem identification. The ranking of priority problem areas in the state, as described above, points to the conclusion that for local programs to have an impact on crash problems statewide, it is necessary to attempt to place countermeasures in the higher population areas. This forms the basis of the primary criterion for project site selection.

Kansas is taking increased steps in addressing safety on our state’s roadways, including establishment of a task force, called the Driving Force, designed to develop comprehensive strategies to reduce fatalities on Kansas roadways. The Driving Force will include both KDOT personnel and stakeholders from other state and local agencies and organizations. The Driving Force will look at safety issues from the beginning design and construction phases through the behavioral issues at the driver level. The goal of this fatality reduction campaign is to reduce highway fatalities by better targeting of problem areas where fatal crashes occur. KDOT is taking steps to improve our traffic records/analyses through professional review of our problem ID methodology, a comprehensive child safety seat/adult seat belt survey and reconciliation of the Kansas Accident Records System (KARS) with/to the Fatality Analysis Reporting System (FARS) to better identify alcohol-related crashes.

Increased participation continues to be realized in the Impaired Driving Deterrence Program (IDDP) and Special Traffic Enforcement Program (STEP) with nearly every agency in the urban population centers (both cities and counties) represented in the programs. The national mobilizations of Buckle Up America/Click it or Ticket (CIOT) and You Drink, You Drive, You Lose have benefited from the greater participation of local agencies and targeted media campaigns. The targeted media include paid television and radio advertisements.

KDOT recently organized a Traffic Records Coordinating Committee and completed a statewide Traffic Records Strategic Plan. This committee will be crucial in determining potential areas for improvement in traffic record information collection, analysis and dissemination. In FY 06, we completed an assessment of our Alcohol Programs, the recommendations and strategies from the assessment will undoubtedly help improve our efforts throughout the state to reduce alcohol related incidents.

FY 06 corridor activities will continue into FY 07. Corridor enforcement will continue the effort of CIOT activities. Paid media (radio and print) will be coupled with enforcement on selected high interest corridors in the state.

Kansas has clearly experienced a downward trend in the crash rate, fatal crash rate and injury crash rate over the last three decades, in spite of the increasing number of drivers and vehicles on the road. The fatality death rate dropped to 1.43 fatalities per 100 million vehicle miles traveled, in 2005. This is the 1st time Kansas has been below the national average since 1992. The 2005 injury rate of 75.74 per 100 million vehicle miles traveled reached its lowest level since KS crash data has been recorded.

While these figures point to positive change, every year approximately 420 motorists lose their lives on Kansas roadways. Another 20,000 are injured each year. Each year, approximately 100 people die in alcohol-related crashes. Novice drivers under 21 years old are involved in approximately 30% of all crashes,
while they represent 10 percent of all registered drivers. An additional area of concern includes occupant protection, where in 2005, 66 percent of occupant deaths were unrestrained. Alcohol-related crashes remain a serious concern where 93 people died in 2005. Speed-related fatalities decreased in 2005 to 105 from 114 in 2004.

The highest population areas of the state also have the most severe traffic problems. This is true no matter which type of crash problem is examined. For example, Sedgwick County, the county with the highest population in the state, is number one in nearly all crash problems. Even though there are some differences in geographical ranking of the types of crashes, the largest 30 to 40 counties population-wise, are the 30 to 40 counties with the most severe traffic problems. Consequently, it is of primary importance to place programs in these high population areas.

Additional projects are best undertaken on a statewide approach. This is the direction taken for selective traffic enforcement training, occupant protection usage projects, driver education programs, public information and education, and comprehensive projects which combine various elements of local law enforcement, court resources and schools.

Nearly 40 counties and municipalities will conduct sobriety checkpoints/saturation patrols (IDDP) and more than 130 local law enforcement agencies will conduct STEP (Special Traffic Enforcement Program) mobilizations. One hundred fifty projects statewide cover occupant protection, impaired driving, alcohol public information, youth leadership, sobriety checkpoints and saturation patrols, traffic enforcement training, driver education, and safe driving education.

Although the larger populated areas of Kansas present the most exposure to problems involving crashes, the less populated areas exhibit a need for improving their problem locations. On average, 75 percent of fatalities occur in rural areas of the state. The statewide projects listed above will utilize their resources in combating this problem.

Local law enforcement agencies will partner with KDOT in preparation and transmission of electronic data. This partnership will assist in improved data collection and ultimately allow for improved and an even greater targeting of specific problems and programs.

In conjunction with local entities, KDOT provides funding and engineering expertise in addressing local traffic safety issues. Coupled with specific activities, this program also hosts workshops for local entities targeting the complexities of and issues related to traffic safety.

The planning and implementation of effective highway safety countermeasures often require travel throughout the fiscal year. The KDOT Bureau of Traffic Safety will attend National and Regional trainings and conferences to gain additional information and technologies that will be essential to program efforts in the state. The Safety Engineer position, located in the Bureau of Traffic Engineering, coordinates KDOT’s engineering (hard) side of safety. This position develops the Strategic Highway Safety Plan, which adds the strategies contained in this document to engineering solutions in order to address six emphasis areas: Impaired Driving, Occupant Protection, Lane Departure, Intersections, Inexperienced/Novice/Teen drivers, and Driver Behavior and Awareness. This plan is to be endorsed by the Governor in September 2006 and teams will be formed to implement the strategies for each of the emphasis areas.
New programs that we will institute this year will include hiring a Traffic Safety Resource Prosecutor, contracting for court monitoring of DUI cases, contracting for minority community outreach coordinator, formation of a DUI Task Force and an Standardized Field Sobriety Testing (SFST) Advisory Committee.

It is obvious from the statewide problem analysis that the most effective reduction of fatalities and injuries attributed to motor vehicle crashes could be achieved by the elimination of impaired driving, and a significantly increased occupant protection usage rate in the state.

**Performance Goals.** The Bureau of Traffic Safety establishes performance goals as a requirement of state strategic planning and KDOT strategic planning. As stated above, performance goals are established based upon problem analysis. Long-term impact goals are established, with yearly strategy-based performance measures. The strategy-based performance measures reflect the current programming presented in federal fiscal year 2005. Baseline is an average of the five years 2001-2005 and also is the database for our problem identification.

The following section contains the program area plans included in the highway safety plan, the long-term goals for each program, the strategy-based benchmarks identified for federal fiscal year 2006 and the projects selected to achieve the goals. The long-term goals address alcohol, emergency medical services, occupant protection, paid media, pedestrian and bicycle safety, police traffic services, roadway safety, motorcycle safety, safe communities, traffic records.

**HS Form 217, highway safety program cost summary.** The proposed allocation of funds is detailed in form 217 which follows.
**January**-Community Forums held to gather input on specific plans and projects. BTS consultants staffed all of these forums. Following the forums all input is combined, analyzed, and reported out by BTS staff.

**February**-Follow-up meetings held to share the combined ideas from all forums. This involved smaller groups with particular expertise such as law enforcement, health care, etc.

**March**-BTS staff consultants and others study both the input from forums and follow-up to make recommendations in each NHTSA program category. (i.e. Occupant Protection, Alcohol...)

**April-May** Bureau and Division management make the final decision on the program mix and funding proposals for the 2007 Draft Highway Safety Plan.

**June**-Bureau management incorporates the draft Kansas HSP programs and funding strategies into the revised 2007 state fiscal years budget. Staff meeting to finalize plan.

**August**- Draft is submitted to NHTSA for feedback, as well as feedback via the state budget process, and is incorporated into the plan.

**September**-Final version of the 2007 Kansas Highway Safety Plan submitted to NHTSA and FHWA.

**October**-Implement the plan.
Statewide

The Problem

- In 2005, 428 people were killed and 22,723 injured in traffic crashes in Kansas.
- In 2005, Fatality rate was 1.43, which is below the national average of 1.46
- In 2005, Seatbelt rate was 69 percent, which ranks 43<sup>rd</sup> out of the 50 states.

Goal
- To reduce the traffic fatality rate by .05 annually to 1.33 in 2007 and 1.23 in 2009
- To raise the seatbelt rate by 3% each year to 75% in 2007 and 81% in 2009
- To lower the percentage of alcohol-related fatalities by 1.5% each year to 19.9% in 2007 and 16.9% in 2009
- To increase the number of grant funded projects with local law enforcement agencies to 165 in 2007 and 175 in 2009
- To provide increased media funding towards targeted problems

Performance Measures
- Traffic fatality rate per 100M VMT
- State seat belt usage rate as determined through observational surveys
- Number of alcohol-related fatalities compared to overall fatalities

Strategies
- Provide resources that allow staff to receive additional training opportunities in-state and out-of-state by organizations dedicated to traffic safety issues.

Project Summaries

Section 402
PA-0918-07 BTS Staff Travel & Training Costs $25,000
This fund enables Bureau staff to obtain training and attend key conferences in other states. This item has been increased significantly for FFY 07 to allow new staff training on the Grant Tracking System, Program Management and individual program specialties.
Alcohol

The Problem

- In 2005, 93 people were killed and 1,932 injured in alcohol-related traffic crashes in Kansas.
- In 2005, Under 21 alcohol-related crashes accounted for 17.1% of all alcohol-related crashes and 10.7% of all alcohol-related fatalities.
- Current breath alcohol equipment is becoming out dated; some pieces have been in service since 1990.
- Inconsistent prosecution and adjudication of alcohol violations exist.

</tbody>
</table>
Goal

- To reduce the number of alcohol-related fatalities and injuries by 4% annually to 85 and 1,778 respectively by 2007, and to 77 and 1,624 respectively by 2009.
- To increase the number of local law enforcement agencies participating in grant funded impaired driving deterrence programs to 60 in 2007 and 65 in 2009.
- To lower the percentage of teen alcohol-related crashes by 2% to 13.1% in 2007 and to 9.1% in 2009.

Performance Measures

- Number of alcohol-related fatalities
- Number of alcohol-related injuries
- Number of local projects with law enforcement agencies participating in impaired driving deterrence programs
- Number of teen alcohol-related crashes

Strategies

- Provide locals with training and resources for conducting sobriety checkpoints.
- Recruit additional local participation in the Impaired Driving Deterrence Program (IDDP).
- Increase the number of presentations and distribution of materials given to general public on the dangers of impaired driving.
- Increase the amount of paid media dedicated to reducing impaired driving and teen access to alcohol.
- Underwrite education for court system personnel on impaired driving laws and techniques used in removing impaired drivers.
- Increase the number of Drug Recognition Experts in the state and provide opportunities for officers to maintain their certification.
• Provide education for high school students on the dangers of impaired driving.
• Develop materials and implement activities aimed at pre-teen prospective drivers (ages 12-14) to begin educating them about the risks of alcohol use and its effect on safe driving.
• Increase the distribution of materials and number of presentations to the general public on the risks associated with impaired driving and underage drinking.
• Provide new state of the art breath alcohol testing equipment for use by law enforcement.
• Research and begin process of establishing a pilot DUI court in Kansas.

Project Summaries

Section 402
AL-0924-07  Kansas Drunk Driving Prevention Office  $451,226
This office provides educational and public awareness materials and coordinates activities aimed at reducing the incidence of drunk driving crashes. The current contractor, Kansas State Nurses Association, maintains a clearinghouse of printed brochures and incentive items for distribution to the general public. These items provide an overview of Kansas alcohol laws and related penalties as well as statistical information and suggestions for avoiding legal and personal injury/death. Prevention messages are targeted to the general driving public including youth, ages 14-20, and adults aged 21 and over. In addition, a variety of educational and awareness activities (training seminars, presentations, displays, etc.) are conducted for middle- and high-school students, the general public, civic groups, military facilities and faith communities, as well as professionals in law enforcement, emergency medical services and education. The office annually conducts a statewide survey of students in middle- and high-school to evaluate their attitudes and behaviors about alcohol use and safe driving practices. The contractor also participates in and supports prevention activities conducted by other groups around the state.

AL-9494-07  Public Information and Education  $19,500
Project enables the Bureau to print selected materials, coordinate public information and education committees, and conduct or help sponsor special events. Included are signage projects at events such as WakarusaFest, near Lawrence, and the Lenexa BBQ where heavy beer consumption results in significant on- and off-site enforcement challenges.

AL-0926-07  DUI Court  $125,000
These funds will enable the Bureau to establish a pilot DUI court in the state. KDOT will expand this program to specific areas in the state after the pilot program has been established.

AL-0927-07  Judge’s Training  $20,000
The conference enhances and provides information to municipal and district court judges and court personnel on new laws and the current techniques and resources utilized to remove impaired drivers from Kansas roadways. This program will work in conjunction with the Office of Judicial Administration.

AL-xxxx-07  Wheel Locks or Clubs for DUI Offenders  $5,000
The pilot contract will assist a local prosecutor in the purchase of wheel locks or similar items to assist in the impoundment of vehicles in repeat DUI offender cases.
Section 163
AL-IDDP-07 Law Enforcement IDDP Patrols $220,000
Provides overtime funding for approximately 30 local law enforcement agencies to conduct a prescribed number of saturation patrols and sobriety checkpoints throughout the grant year. An allowance is also provided for commodities needed to conduct impaired driving traffic activities.

AL-9106-07 Kansas Highway Patrol Blood Alcohol Unit $258,972
Provides support resources for local sobriety checkpoints and saturation patrols. In addition, provides support for SFST and Drugs that Impair Driving. The contractor also coordinates the DRE program, targeting metropolitan and major corridor areas and to present/train at educational institutions on drugs in the academic environment. The BAU will work to teach the “Drugs in the Academic Environment.”

Section 410
AL-0935-07 Intoxilizer Updates/Replacements $966,081
KDOT, in conjunction with the Department of Health and Environment, will replace existing Intoxilizer 5000 units that are prevalent in the state with new Intoxilizer 8000 state of the art breath testing machines.

AL-xxxx-07 Traffic Safety Resource Prosecutor $150,000
The Traffic Safety Resource Prosecutor will assist prosecutors in the adjudication of the traffic laws with an emphasis on “drunk driving.” This position will provide continuing legal education programs, technical assistance and other services to Kansas’ prosecutors and assistants to improve their ability to prosecute violations of traffic laws.

AL-xxxx-07 BAT Van $170,000
This project will purchase two dedicated, state of the art mobile Breath Alcohol Testing (BAT) van for use by a local jurisdiction in a high alcohol crash location to enhance enforcement of the impaired driving laws in the state.

AL-IDDP-07 Law Enforcement Mini - IDDP Patrols $80,000
Provides overtime funding for approximately 30 (smaller) local law enforcement agencies to conduct a prescribed number of saturation patrols and sobriety checkpoints throughout the grant year.

AL-0929-07 PBT’s for Locals $25,000
These funds will enable the Bureau to purchase Preliminary Breath Testing units for local law enforcement. These units support the effort to remove impaired drivers and test all individuals involved in a crash.

AL-xxxx-07 MADD/SADD Locals for Court Monitoring $75,000
This contract will assist MADD/SADD, DUI Victim Center in Wichita and local impaired driving advocates with the monitoring of court cases. This grant should provide insight into more efficient prosecution of impaired drivers.
Emergency Medical Services

The Problem
- Lack of statewide electronic EMS data collection system
- Lack of quick response time in rural areas.

Goals
- Develop and implement a statewide data collection system
- Reduce response time in rural areas

Performance Measures
- Data collection committees and system development
- Response times in rural areas

Strategies
- Assist KS Board of EMS with strategies and funding
- Provide equipment necessary to positively affect response times in rural areas
- Perform an EMS Assessment

Project Summaries

Section 402
EM-1100-07  Emergency Medical Services  $80,000
This program will provide support to the EMS community geared towards collection of data.

EM-xxxx-07  Emergency Medical Services Assessment  $20,000
This funding will fund an EMS Assessment. The previous Assessment was conducted in 1993. The Assessment will provide guidance into the development of a data warehouse that will assist in traffic safety planning.
Motorcycle Safety

The Problem

- Motorcycle crashes are continuing to rise.

![Total Motorcycle Crashes 2000-2005](chart.png)
**Goal**
- Lower the number of motorcycle crashes by 5% per year to 911 in 2007 and 809 in 2009

**Performance Measures**
- Total number of motorcycle crashes

**Strategies**
- Promote safe motorcycle driving initiatives

**Project Summaries**

**Section 402**
**MC-xxxx-07** Motorcycle Safety Media Campaign $20,000
These funds will allow the Bureau to develop and implement a motorcycle safety campaign aimed at impaired driving.

**Section 2010**
**MC-1200-07** Motorcycle Safety $120,000
This project will enable KDOT, with the assistance of task force, to purchase safe motorcycle driving promotional items, produce and distribute educational materials and brochures. A media effort will also be coordinated with this funding.
Occupant Protection

The Problem

- In 2005, 428 people were killed, of which 66 percent were not properly restrained
- In 2005, seatbelt rate was 69 percent, which ranks 43rd out of the 50 states
- In 2005, 81 percent child restraint use for children 0-4
- In 2005, 49 percent child restraint use for children 5-9
- In 2005, 47 percent restraint use for children 10-14

</tbody>
</table>
Goal
- To raise the seatbelt rate by 3% each year to 76% in 2007 and 82% in 2009
- To reduce the traffic fatality rate by .05 annually to 1.33 in 2007 and 1.23 in 2009
- To raise the child restraint rate for 0-4 year olds by 2% per year to 85% in 2007 and 89% in 2009, to raise the rate for the 5-9 and 10-14 year old groups by 4% per year to (5-9) 57% in 2007 and 65% in 2009; (10-14) to 55% by 2007 and 64% by 2009.

Performance Measures
- State seat belt usage rate as determined through observational surveys
- Traffic fatality rate per 100M VMT
- Child restraint usage rate as determined through observational surveys

Strategies
- Provide more grants to law enforcement agencies for overtime enforcement of safety belt violations through the Special Traffic Enforcement Program (STEP).
- Provide statewide occupant protection public education and information through media campaigns in conjunction with law enforcement mobilizations and special corridor activities – English and Spanish.
- Increase number of CPS Safety Seats available state-wide in recognized distribution/fitting stations, targeting booster seats, and expand the number of seats distributed to approved fitting stations for low income families.
- Continue KSBEO Adult/Child Safety Belt Surveys, and Boosters to Belts education state-wide through presentations, brochures etc.
- Provide state-wide media awareness campaign on occupant protection.
- Continue CPS Safety Training using NHTSA standardized curricula.
- Utilize corridor enforcements to sustain occupant protection use.
- Use seatbelt survey results to target problem areas of the state.

Project Summaries

Section 402

OP-STEP-07  Special Traffic Enforcement Program  $840,000
This program provides funds for our existing 120 local agencies, 8-10 new agencies, and the Kansas Highway Patrol to participate in up to four holiday campaigns in FFY 07.

OP-0934-07  Kansas Safety Belt Education Office  $688,822
This contract includes the following components; a base contract for safety belt education, a Boosters to Belts program, child passenger seat survey and education, and an extensive annual observational survey of adult occupant protection usage. This program also supports the child passenger safety instructors, technicians and advocates in the state. The current contractor is DCCCA, Inc.

OP-0930-07  Public Information and Education  $20,000
These project funds will enable BTS to purchase and distribute promotional items and printed materials that have an occupant protection message to both the general public as well as various target populations.

OP-xxxx-07  Novice Driver Education/Media  $100,000
This project is designed to provide consistent, thorough and reputable education and resources for novice drivers. The contract would provide concentrated electronic and perhaps print media messages towards the novice driver population. Messages would address major topics such as impaired driving, seat belts, driving distractions and responsible driving. The messages will run in conjunction with major events such as holidays, Spring Break, Prom and the start and close of the school year.

OP-1081-07  Child Passenger Seat Distribution  $185,000
Approximately 2,600 seats are purchased and distributed each year to fitting stations throughout the state who work with low-income families, and who are qualified to install the seats as well as instruct parents on their use.

OP-xxxx-07  Booster Seat Distribution  $15,000
The state of Kansas recently passed a booster seat law and this program will contract with school districts in purchasing booster seats.

OP-xxxx-07  Traffic Awareness Survey  $48,000
This contract provides funding for a phone or internet survey of Kansas’ target population. Results would reveal seatbelt use, tickets received, impaired driving in the state, response to media messages and preference towards traffic laws for child and adult occupant protection and knowledge of current OP and CPS laws.

OP-xxxx-07  Primary Law Survey  $40,000
KDOT will solicit the services of a professional pollster to conduct a survey on the perceptions of the implementation of a primary seat belt law in the state. The survey will track attitudes and perceptions of this potential law and track responses by age and geographic location.

</tbody>
</table>
Paid Media

The Problem
- In 2005, only 69% of Kansans were seat belted
- Kansas currently ranks 43rd in the nation in seat belt use
- Drunk driving still kills over 90 people annually in KS

Goal
- To affect awareness and attitudes concerning seat belt use and drunk driving

Performance Measures
- Media will be assessed utilizing the following:
  - Number of airings and print ads for each message (both paid and valued added)
  - Audience size determined through appropriate source for medium (reach and frequency)
  - Surveys
  - Focus Groups

Strategies
- Advertising seatbelt & alcohol messages during sporting events at the state’s three Division I colleges
- Advertise at special events/venues in KS to reach target audiences for seatbelt and alcohol messages (ie. Verizon Wireless Amphitheater, Country Stampede, Heartland Park Raceway)
- Continue and expand our media messages during the national mobilizations
- Utilize media during specialized corridor enforcement activities

Project Summaries

Section 402
PM-xxxx-07 General/University Advertising $420,000
These funds will enable the Bureau of Traffic Safety to purchase advertising to raise the awareness of impaired driving and occupant protection in the state. These funds will also allow for advertising at the three large universities in the state (Kansas State, Kansas and Wichita State).

PM-xxxx-07 You Drink, You Drive, You Lose Campaign $50,000
Purchase media air time for a targeted media effort to support local law enforcement’s Labor Day campaign combating impaired driving. It will be coordinated by the KDOT media contractor.

PM-1057-07 Corridor Enforcement Media Effort $70,000
This program is designed to sustain the May CIOT effort in key corridors of the state’s highway system. The media effort will be held in conjunction with enforcement efforts.

PM-1135-07 Clear Channel Entertainment $65,000
Project will enable KDOT to place advertisement at this concert venue. The advertisement will promote occupant protection, the designated driver program, and target underage drinking.
402 funds will go toward another major media effort during our Click It Or Ticket/Buckle Up In Your Truck Campaign in May 2007. This campaign will rely significantly on TV and radio spots that were previously produced. This is a continuation of efforts to gauge the effectiveness of Kansas’ significant increase in spending on both law enforcement and media in the May campaign. This will involve both an observational survey as well as a public perception survey conducted at our state’s Division of Motor Vehicle Driver’s License stations in selected counties.

**Evaluation**

Evaluations will be conducted to support the media efforts described in the Paid Media section. KDOT plans to conduct a phone or internet survey to assess traffic safety issues such as seatbelt use, citations issued, impaired driving perceptions in the state, response to media messages and knowledge of traffic safety laws. This survey will be funded under the 402 Occupant Protection program area and will total $48,000. In addition, each paid media buy will include the reach/frequency, gross rating points and total audience reached for each media outlet focusing on the target audience. These “media buys” will be approved by KDOT prior to any media buy. Typically, the “media buys” generate free media space due to the large number of buys placed. This evaluation is included in the Safe Communities program area and is part of the Comprehensive Media Campaign and is estimated to cost $25,000. KDOT will detail the buy plans and results in the annual report. Total estimated cost of evaluation is $73,000.

**Fatality Billboard**

This project would fund to electronic billboards (Topeka and Wichita) that would display the number of people killed on Kansas roadways to date. The board would be updated daily to raise awareness of the importance of traffic safety.

**Heartland Park/Kansas Speedway Exit Signs**

KDOT will look to place occupant protection and impaired driving public service announcement signs at the exits of these racetracks.

**You Drink, You Drive, You Lose Campaign**

Purchase media air time for a targeted media effort to support local law enforcement’s Labor Day campaign combating impaired driving. It will be coordinated by the KDOT media contractor.
Pedestrian & Bicycle Safety

The Problem
- In 2005, 28 Pedestrians and Cyclists were killed.
- In 2005, 320 Cyclists were injured.
- In 2005, 474 Pedestrians were injured.

Goal
- To reduce total crashes by 5% per year to 775 by 2007 and 689 by 2009
- To reduce fatalities by 5% per year to 25 by 2007 and 22 by 2009

Performance Measures
- Number of crashes involving pedestrians and cyclists
- Number of pedestrian and cyclist fatalities

Strategies
- Maintain clearinghouse of child and adult bicycle brochures to distribute upon request.
- Maintain clearinghouse of child and adult pedestrian brochures to distribute upon request.
- Provide promotional items for the Annual Walk Your Child to School Day.
- Study whether enhanced design and construction is needed to reduce crashes involving pedestrians and cyclists.

Project Summaries

Section 402
PS-0932-07 Public Information and Education $15,000
These project funds enable Bureau staff to produce and/or distribute printed materials and promotional items on both bicycle and pedestrian safety. In addition, this program will promote bicycle education by purchasing and distributing bicycles to children around the state. KDOT will sponsor a poster contest emphasizing bicycle safety and the importance of helmets. The winners will each receive a helmet and bicycle.

PS-1131-07 Bike Helmets $15,000
This grant is with the Safe Kids Kansas coalition. Safe Kids Kansas promotes bicycle education and the proper fit of bikes and helmets. The program purchases bike helmets and distributes them around the state at children focused events.
Police Traffic Services

The Problem
- In 2005, 16 of the top 20 contributing circumstances in crashes are driver-related.
- In 2005, decreasing budgets are preventing most law enforcement agencies from acquiring the necessary traffic safety-related equipment.

</table>

Goal
- Reduce the total crashes in the state by 5% per year to 61,809 in 2007 and 54,943 in 2009
- Reduce the total rate of crashes by 5% per year to 2.01 in 2007 and 1.73 in 2009
- To reduce the traffic fatality rate by .05 annually to 1.33 in 2007 and 1.23 in 2009

Performance Measures
- Number of total crashes in Kansas
- Crash rate per million vehicle miles
- Fatality rate per million vehicle miles

Strategies
- Provide funding for local law enforcement to attend training in the latest techniques of traffic enforcement.
• Continue funding for the KHP RAVE program to remove impaired drivers and target aggressive driving habits.
• Continue to promote occupant protection and alcohol issues around the state.
• Continue two additional part-time LEL’s targeting areas: Southeast and Northwestern Kansas to assist the full-time statewide LEL.

Project Summaries

Section 402

PT-0938-07  Local Travel & Training  $25,000
These funds enable local jurisdictions to be reimbursed for special traffic-related training opportunities. This funding will also reimburse travel for persons participating in the SFST Advisory Committee.

PT-xxxx-07  Law Enforcement Liaison  $148,000
In addition to the one full time LEL, KDOT has added two part-time LEL’s to maintain and enhance the good working relationship with the nearly 450 diverse local law enforcement agencies in promoting occupant protection and impaired driving issues around the state.

PT-1703-07  SRO Mini-Grants  $75,000
This program would help fund a program to partner with SRO’s and determine educational resource needs for Kansas high schools.

PT-0931-07  Local Law Enforcement Incentives  $200,000
KDOT plans to purchase and distribute equipment to local law enforcement agencies that promote and participate in traffic safety enforcement efforts.

PT-1704-07  LEL Luncheons/Operations Impacts  $50,000
Operation Impact is the gathering of local law enforcement agencies based upon their geographic location. The gatherings are designed to encourage cooperation and resource utilization between agencies on efforts to promote traffic safety in their region.

PT-1708-07  Crash Reconstruction Training  $22,000
These funds allow local law enforcement to attend or host crash reconstruction training.

PT-1706-07  Traffic Unit  $275,000
Purchase equipment and fund officers for a small traffic unit in a problem area to support enforcement of traffic laws in their respective jurisdiction.

PT-1707-07  Kansas Highway Patrol Equipment  $200,000
KDOT will partner with the Highway Patrol to address traffic safety needs and purchase equipment that will enhance enforcement in the state.

Roadside Safety

The Problem
- Lack of local engineering expertise in some areas concerning roadside safety issues

Goal
- To provide training, technical assistance and materials to local agencies to improve the safety of local roadways.
- To provide traffic safety oriented seminars/workshops

Performance Measures
- Support to a number of local and state officials ability to provide safer roadways through training, materials and assistance to accomplish a reduction in crashes statewide
- Programs and projects will be evaluated for completeness and implementation of the project recommendations

Strategies
- Continue support of local and state officials ability to provide safer roadways through training and materials

Project Summaries

Section 402
RS-1402-07  Kansas State University  $128,800
Provide training for Kansas public employees who have traffic safety responsibilities. A secondary objective is to develop and/or update workshop materials and handbooks to be used in these training and on-the-job activities.

RS-0618-07  Bucher, Willis, and Ratliff Consultants  $75,000
In order for the State to realize the highest possible pay off in funds allocated for highway safety it is necessary that traffic engineering services be provided to local government units who currently do not have traffic engineering expertise. Traffic expertise can best be provided to those governmental units on an individual project basis by utilizing consulting firms engaged in traffic, transportation, engineering and planning activities to analyze the problem and develop a solution.

RS-1618-07  TranSystem Corporation  $75,000
In order for the State to realize the highest possible pay off in funds allocated for highway safety it is necessary that traffic engineering services be provided to local government units who currently do not have traffic engineering expertise. Traffic expertise can best be provided to those governmental units on an individual project basis by utilizing consulting firms engaged in traffic, transportation, engineering and planning activities to analyze the problem and develop a solution.
Safe Communities

The Problem
- Lack of knowledge transfer and communication between traffic safety advocates and communities across Kansas.

Goal
- Establish community-level traffic safety programs to promote partnerships, communication and collaboration statewide; 1 program by 2007 and 2 by 2009
- Increase attendance of annual traffic safety conference to 336 in 2007 and 371 in 2009

Performance Measures
- Number of community-based safety programs
- Number of attendees at the annual Traffic Safety Conference

Strategies
- Promote and conduct annual statewide conference on highway safety issues
- Solicit and promote community-based traffic safety programs in Kansas
- Improve information and resource availability for local agencies and advocates in Kansas.

Project Summaries

Section 402
SA-0943-07 Kansas Transportation Safety Conference $90,896
This project provides for an annual two-day statewide Transportation Safety Conference to support the implementation of safety strategies and improve communication among diverse transportation safety advocates, youth and adult. This contract is presently administered through the KU Department of Continuing Education by the University of Kansas Center for Research, an independent organization affiliated with the University of Kansas.

SA-1066-07 Public Information & Education $20,000
These project funds enable KDOT to purchase safe driving promotional items, reproduce and distribute educational materials produced by media contractor, NHTSA, or other reputable sources. KDOT will work with the Department of Commerce in promoting safe driving throughout the state. This fund will also be used to purchase subscriptions or memberships in companies or organizations relating to enhanced activity in the traffic safety community.

SA-1024-07 Kansas Operation Lifesaver Inc. $15,000
These project funds enable the organization to reduce rail crossing crashes through various methods of public information and education.
SA-1903-07  PTA/PTO  $50,000
This project is designed to work closely with school based Parent Teacher organizations in promoting traffic safety initiatives in and around the schools. BTS will work to secure a speaking and presentation spot at the annual meeting.

SA-1904-07  Community Based Traffic Safety  $150,000
Grass root efforts are needed to improve driving behaviors in the state. This pilot program will reach out to communities that seek to make a positive change. This project will include the “Drive” program. Recent studies have shown that the novice driver attitude plays an important role in the safety of this high-risk driving population. The “Drive” program is a unique approach given to drivers education instructors to address this issue.

SA-1907-07  Safer Roads  $75,000
The project is designed to provide for local advocate efforts to raise awareness of Traffic Safety issues. A Task Force has been assembled which will be compiling and submitting recommendations on ways to reduce the number of deaths on Kansas roadways.

SA-1908-07  Wyandotte County Safe Communities  $133,435
A traffic safety grant has been made to the Unified Government Public Health Department of Wyandotte County. That agency will partner with a coalition of safety advocates, including area law enforcement, Children’s Mercy Hospital, KDDP, KSBE0, and others to bring awareness and change to the traffic safety problems that exist in the county.

SA-1057-07  Comprehensive Media Campaign  $257,000
This contract provides for professional development of our message concerning safe driving, occupant protection, and impaired driving. The contractor must produce original TV, radio, and print material, or modify those produced by NHTSA or other entities to fit the Kansas dynamics and population. The contractor will also be expected to purchase media time and print space in a manner that optimizes our media dollar by successfully reaching the target populations. Assessment and evaluation activities will also be conducted under this program.

SA-xxxx-07  Program Evaluator  $40,000
KDOT will solicit the services of a professional evaluator to examine the cost-effectiveness of the planned traffic safety campaigns/programs in the state.

Section 1906
SA-xxxx-07  Racial Profiling  $643,613
Kansas has applied for this grant opportunity centered around Racial Profiling. If awarded, Kansas will focus on gathering and making any racial profiling traffic stop data available for public viewing through the Attorney General’s website.
Traffic Records

The Problem
- Lack of a comprehensive, utilized electronic crash data collection system.
- Linkage of crash data between KDOT and other state agencies.
- Very little GIS information
- Approx only 70 local law enforcement agencies involved in initial implementation of Electronic Accident Data Crash Reporting (EADCR)

Goal
- Implementation of Traffic Records Coordinating Committee (TRCC) Strategic Plan
- Implementation of Field Reporting System
- More efficient data mining software to retrieve data from the KARS data base

Performance Measures
- Number of TRCC Projects
- KDOT 850, 851 & 952 forms updated

Strategies
- Implement TRCC
- Provide better training and education for law enforcement.
- Provide resources and expertise in electronic data transmission.
- Develop GIS data.
- Develop linkage between other state data systems
- Data Mining Software

Project Summaries

Section 402

TR-2001-06 EADCR Maintenance $10,000
These funds, will be utilized to purchase software and support the current KDOT program to promote electronic data transmission from local law enforcement.

TR-2103-07 Distribution of GPS Units Program $50,000
GPS units will allow law enforcement officers to place exact coordinates of crashes. This technology will enable data users to pinpoint problem areas with greater ease and ultimately allow planners to address problem areas with effective countermeasures.

Section 408

TR-2101-07 Electronic Transmission of Traffic Records $557,052
If KDOT qualifies for funds in Year 1 of SAFETEA-LU these funds will allow KDOT to proceed with updating and maintaining the current electronic data received in the state. The 2005 Traffic Records Assessment and Strategic Plan will provide the roadmap to enhancement.
TR-xxxx-07  Traffic Records Public Information and Education  $20,000
These funds will support the efforts of the Traffic Records Strategic Plan to print selected materials, coordinate public information and provide travel expenses for participants in its implementation.

Section 163
TR-2102-07  Traffic Records Consultant  $100,000
This position will assist in the coordination of all the parties associated with traffic records and improve the efficiency and accessibility of the data. The Consultant will assist the state in the implementation of the Traffic Records Strategic Plan that was developed in FFY 06.

TR-xxxx-07  Traffic Records Strategic Planning Projects  $900,000
These funds will be utilized to enhance traffic records initiatives as identified in the Traffic Records Strategic Plan developed in FFY 06.
